"Simplifying the Complex"

Software Solutions for the
Dynamic Enterprise

CS-CVS: Collaborative Vendor System

LEVERAGE YOUR SUPPLY BASE BY INCLUDING THEIR EXPERTISE IN YOUR PRODUCT DEVELOPMENT...

- Reduced RFQ/RFI (RFX) cycle time
- Simplified analysis of supplier bids
- Automated sourcing activities
- Reduced cost of quoting
- Reduced internal workload

WE HAVE THE SOLUTION-CS CVS

- Enable suppliers and partners to securely participate in product design processes across organizational and geographic boundaries.
- Allow preferred suppliers self-service access to vendor specifications, item documentation, lead times, quotes, and request / change management.
- Establish user-level privileges to grant design and manufacturing partner users unlimited workspace access to support their contractual commitments, or limit usage to request and change process functionality.
- Regardless of your business needs, CS-CVS tracks detailed interaction and change history at every step.

Don't shuffle costs in your supply chain; eliminate them!

Contact our PLM team to

- Achieve your new product launch goals
- Reduce direct material costs
- Decrease redundant efforts
- Increase margins
- Manage your QS/ISO requirements

The Challenge:

Market pressures have created an extremely competitive supply chain. Companies that embrace this understand that leveraging the extended enterprise with team members not only in different buildings, but also working for different companies is paramount to success.

The Solution:

CS-CVS (Collaborative Vendor System) enables your supply chain to provide information by a web-based interface to your program management and RFQ enterprise system.

CS-CVS has helped our customers reduce turnaround time on sourcing. Suppliers are trained in the CVS system to streamline the process of sending and receiving information. Everything from electronic RFQ's, drawings, part details to QS documentation is processed automatically through your portal.

CS-CVS eliminates cost from your supply chain:

- Paperless transactions
- Automated APQP reporting
- Integrated RFX and engineering change cycle
- Increase visibility of costs in your supply chain
- Increase analysis of bids from your supply base
- Empower purchasing to spend more time improving the supply base, finding cost reductions. Get more out of your purchasing department!
- Provide a central location for all team members to securely view and manage the program requirements. All team members have the right information and the right time

CS-CVS Benefits achieved:

- Reduction of costs by 5% within existing supply base
- Decreased RFQ cycle time by 30%
- Increased communication early in development process
- Increased efficiencies in Purchasing
- Reduction of data entry for Engineering and Purchasing
