

## Software Products: CS-Vue

READY TO MEET CUSTOMER DEMANDS, DRIVE DOWN SALES AND OPERATING COSTS, COMPRESS YOUR SALES CYCLE AND IMPROVE PROFITS?

**WE HAVE THE SOLUTION. ➤**

### **CS-Enterprise:** For Complete Product Configuration Management

CS-Enterprise consists of 10 proven interactive software modules that span the complete demand *and* supply chain—from product specification through quoting, pricing, order promising, order management, proposal generation, sourcing, engineering, manufacturing and delivery. The Web-based product configuration software can protect your investment and significantly enhance the value of your legacy enterprise applications such as ERP, PDM, CRM and CAD—and can be quickly and securely integrated with your channel partners to allow end-to-end visibility and collaboration.

**The complete solution. ➤**

### **The Challenge:**

Every project involves vital drawings, diagrams and other visual documents which undergo multiple iterations, especially during the engineering change phase. Without a way to distribute these in real time throughout the enterprise, changes and other valuable information may not be disseminated to critical parties, resulting in costly confusion and errors.

### **The Solution:**

**CS-VUE** is an advanced visualization and collaboration tool for creating and managing engineering diagrams, CAD drawings and other key documents. The software provides both viewing and mark-up capabilities to add notes, changes, instructions and references, as well as links to other documents. CS-VUE enables users to mark up and annotate documents and save these annotations as mark-up files, to be stored on a local drive, network drive or on a Web server, making them accessible to other connected users.

### **CS-VUE Features/Benefits:**

- Facilitates rapid and accurate communication and collaboration between design and engineering team members, manufacturers and sales personnel, sales agents and customers during the quote, engineering change and program management process
- Allows immediate notification of suppliers and other team members regarding new or changed information in mark-up files with the click of a button
- Enables rapid dissemination of engineering drawings, system assemblies, production sequencing and other vital visual information over the intranet or Internet
- Creates multiple mark-up files for any document and saves mark-ups independently of the document they are associated with to preserve the integrity of the original information
- Consolidates mark-up files for simplified management or archiving purposes
